***Election/Restriction***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-23 are, drawn to a method for identifying a compound that binds to a target, classified in class 435, subclass 7.1.
  - II. Claims 24-28, drawn to a compound identified by the method of group I (product-by-process), classified in different class depending on the compound.

Art Unit: 1639

III. Claims 29-34, drawn to a library comprising multiplicity of non-peptide compounds designed based on a peptide motif, classified in class 435, subclass

7.1.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions of group II (product) and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used in making a wide variety of compounds, such as peptide-nucleic acids, peptides, peptidomimetics. Thus restriction between the groups is proper.

4. Inventions of Group II and III are patentably distinct products. The different products of groups II and III are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Thus restriction between the groups is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Even though some of the groups are classified in the same class/subclass, this has no effect on the non-patent literature search. Different groups would require completely different searches in non-patent databases, and there is no exception that the searches would be co-

Art Unit: 1639

extensive. Therefore, these do not create an undue search burden, and restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CAR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CAR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CAR 1.48(b) and by the fee required under 37 CAR 1.17(I).
